CERN practical days - RF

09:00

Ruben Heine Marvin Noll

14.03.2022

Outline

1. Forenoon Session
   - Band Pass Filter
   - Strip-Line BPM
   - RF - Cavaties
2. Afternoon Session
   - Useless Repetition
   - Coupling of an RF Cavity
3. Resume

Band Pass Filter (1) - Intro

- Stuff
- More Stuff

Strip-Line BPM (1) - Intro

Reflectometry for 500 MHz and 50 Ohm

a. Connector

b. Strip line

- Four 14cm strips
- Short-circuit termination

Strip-Line BPM (2) - Time Domain Reflectometry

- Measuring S11 in time domain to check acceptance criteria
  a. Connector: + 0.5
  b. Strip line: -/+ 0.2
- Repeat for all strip lines

Strip-Line BPM (3) - Frequency Domain Characterization

- Strip-line length from S11
- Comparision with group delay
- Cross-talk from S21
  - Minimum at Hz

RF - cavaties (1) - Intro

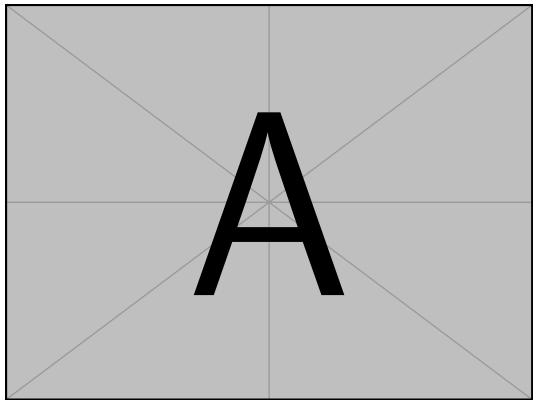
- Multi cell cavity in X-band
- Operating mode at 11.424 GHz
- Under coupled antenna

RF - cavaties (2) - Transmission measurement

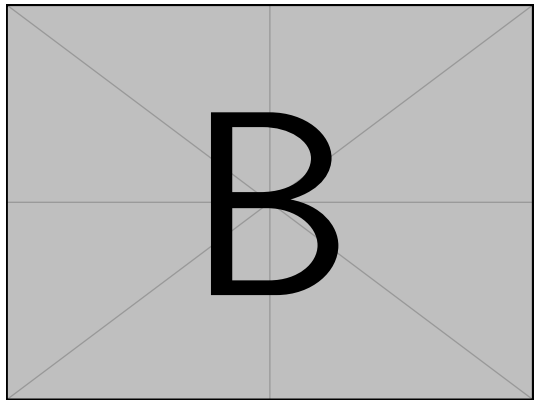
- Identify different modes
- Calculated Q from the $3dB$ bandwidth
- Cross-talk from S21
  - Minimum at Hz

Useless Repetition (Manfred Wendt)

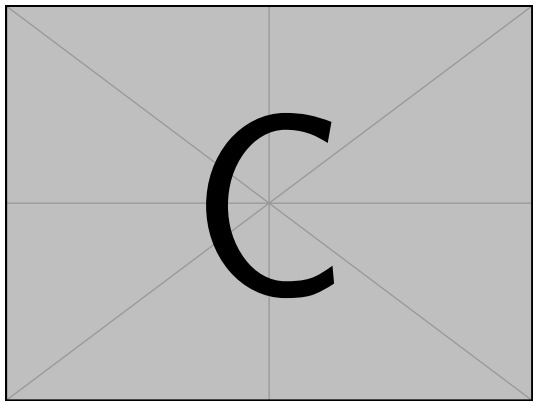
- Stuff
- More Stuff



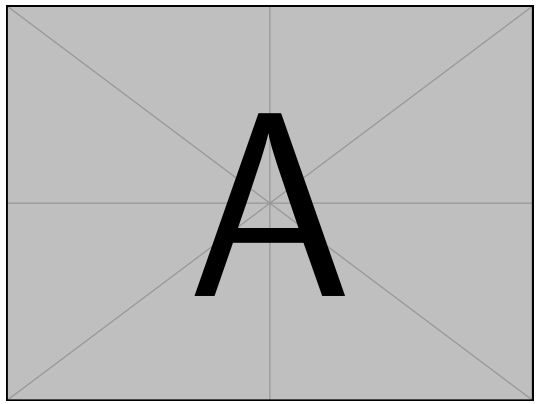
(a) Caption a



(b) Caption b



(c) Caption c



(d) Caption d

RF Cavity, Coupling, Smith Chart (Fritz Caspers)

- Two Antennas in cavaty
  - Longitudinal field antenna
  - Coupling loop
- Under-, over- and critical coupling

Resume

- Last session with Michele
- We learned, that...
- Whatever ...
