

# CERN practical days - RF

09:00

Ruben Heine    Marvin Noll

14.03.2022

# Outline

## 1 Forenoon Session

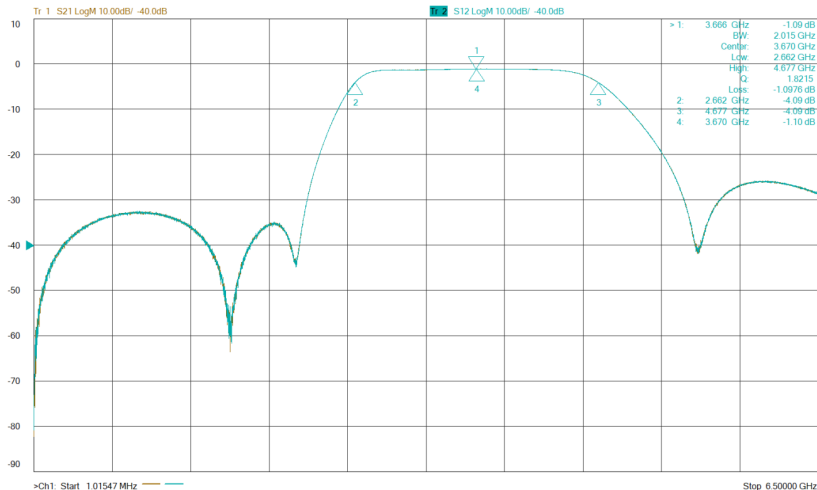

- Band Pass Filter
- Strip-Line BPM
- RF - Cavities

## 2 Afternoon Session

- Useless Repetition
- Coupling of an RF Cavity

## 3 Resume

# Band Pass Filter (1) - Transmission $S_{12}$ , $S_{21}$

$$BW = 2.015 \text{ GHz}, \quad f = 2.66 \text{ GHz} \dots 4.67 \text{ GHz}$$

$$S_{21} \approx S_{12} \Rightarrow \text{Reciprocal}$$

# Band Pass Filter (2) - Input/Output Reflection $S_{11}$ , $S_{22}$

$S_{11} \neq S_{22} \Rightarrow$  Non symmetric

# Band Pass Filter (3) - Phase $\angle S_{12}$

$$t_g = -\frac{d}{d\omega} \angle S_{12} \approx -\frac{\Delta \angle S_{12} [\text{rad}]}{\Delta \omega} = \frac{(110.51^\circ - -131.62^\circ) \cdot \pi/180}{1.002 \text{ GHz}} = 670 \text{ ps}$$

# Band Pass Filter (3) - Group Delay $t_g$

From group delay plot:  $t_g = 608.87$  ps

# Strip-Line BPM (1) - Intro

Reflectometry for 500 MHz and 50 Ohm

a Connector

b Strip line

- ▶ Four 14cm strips
- ▶ Short-circuit termination

## Strip-Line BPM (2) - Time Domain Reflectometry

- Measuring S11 in time domain to check acceptance criteria
  - a Connector:  $\pm 0.5$
  - b Strip line:  $\pm 0.2$
- Repeat for all strip lines

# Strip-Line BPM (3) - Frequency Domain Characterization

- Strip-line length from S11
- Comparison with group delay
- Cross-talk from S21
  - ▶ Minimum at Hz

# RF - cavities (1) - Intro

- Multi cell cavity in X-band
- Operating mode at 11.424 GHz
- Under coupled antenna

## RF - cavities (2) - Transmission measurement

- Identify different modes
- Calculated  $Q$  from the  $3dB$  bandwidth
- Cross-talk from  $S_{21}$ 
  - ▶ Minimum at Hz

# Useless Repetition (Manfred Wendt)

- Stuff
- More Stuff

(a) Caption a

(b) Caption b

(c) Caption c

(d) Caption d

# RF Cavity, Coupling, Smith Chart (Fritz Caspers)

- Two Antennas in cavity
  - ▶ Longitudinal field antenna
  - ▶ Coupling loop
- Under-, over- and critical coupling

(a) Under Coupled

(b) Critically Coupled

(c) Over Coupled

# Resume

- Last session with Michele
- We learned, that...
- Whatever ...
